

# For all reasons & all seasons - a range of Meat & Poultry trays including Vacuumed Skinpack Trays

The flagship eCOvantage 'D' range trays contain up to 90% food grade post-consumer recycle. The 'D' range offers 'Holseal' for perfect MAP sealing where gas barrier performance is critical. A strategic selection of the 'D' range is exclusively engineered for Vacuumed Skin Packaging

- Combined Holfeld Plastics and Par-Pak Europe offer over 80 years of packaging innovation supplying European, UK & Irish markets
- Leading suppliers to the meat processing, packing and retail markets
- Specialists in sustainable packaging and materials technology
- Global award winners for material technology
- Creative designers of bespoke and conventional packaging
- Competitive pricing
- Selected packaging on demand from stock
- Unique 'Tool and Product Design' centre under one roof enabling full management & control allowing a seamless operation and fast tooling turnaround
- The D2/13 & 37 and the D15/13 & 37 are specially engineered for vacuumed skin-packing

## Standard Features

- 1 Rib design** uses less plastic whilst maximising strength and protecting product. The design has been developed with challenging modern packing systems in mind as well as storage and transport
- 2 Materials technology.** A high input of post consumer recycle in the blend reducing reliance on virgin material without compromising performance
- 3 Holseal for perfect sealing** – a lock seal solution perfect for MAP where gas barrier performance is critical
- 4 On shelf attraction** – guaranteed no-fog film – glowing environmental credentials with a low carbon manufacture fully in line with retailers' sustainability strategies

## World Class Beating Carbon Footprint Scoring

We manufacture our own supercleaned material on site, we don't rely on 3rd party manufacturers, which gives us total control of our manufacturing processes. Our packaging contains some of the highest supercleaned post-consumer waste percentage in the market, giving us world class beating carbon footprint scoring.

- The 'D' range has led to a 74% CO<sub>2</sub> saving on raw materials and a 47% reduction in the carbon footprint of Holfeld products over the lifecycle fully meeting Courtauld 3
- eCOvantage demonstrates the same characteristics and material properties as virgin with excellent chill impact properties and top load performance
- The range is fully compatible with the industry standard jig fit range
- All trays manufactured with a blend up to 90% post-consumer recycle
- Available in a choice of colours, varying depths from shallow to deep
- 100% fully recyclable
